

Title: Those Who Make It

Students who make it in college all have one thing in common: they are prepared. Research has proven that those students who take an AP class are ready for the demands of college work. AP potential is determined by two primary factors: teacher recommendation and student readiness. All sophomores whose PSAT scores reflect an aptitude to excel in any content area will receive an invitation to attend an AP Potential meeting **Tuesday evening, February 9, at 6:00 PM** in the cafeteria. Parents and students will receive information about Advanced Placement and its benefits and courses to be offered at CHS in the 2010 – 2011 school year. PreAP and AP teachers currently teaching will be available for answering questions. Please plan to attend this meeting that will help you and your student to register for the classes that will prepare him or her for future success.
