

Power School Parent Portal Informational Guide

What is PowerSchool?

PowerSchool is an online application that is closely tied to student grades and attendance.

- Safe access to your child's grades and attendance.
- Current information for staying on top of academic and attendance concerns.
- Updated as front offices and teachers enter attendance and grade book information!

How do I get access?

To gain access to your student's PowerSchool account (automatically created), simply visit your child's school (7:30-3:30 on school/in-service days) with a photo ID to pick up your User ID and Password (RRHS, CHS, LMS, ERMS, MVMS, RRMS and IHS only).

- You can access the PowerSchool website from any computer with secure online access (i.e., the public library, your local senior center, etc.).
- For the protection of your child's data, NEVER share your child's user ID or password
- Be SURE to close the PowerSchool site if you are leaving the computer even for what you think may be a 'split second'

IF you have children at more than one of these schools, you can pick up the User ID and Password for all of your children at the same time, at any of the schools listed above.

What is the web site address where I log in?

<http://powerschool.rrps.net/public/>

How do I find out more information?
