

# NOVEMBER

Dear Families,

Fall is upon us and it's bringing cooler weather and even SNOW!! The children had a great time exploring music, sounds, and various instruments. We have seen talented guitarist, drummers, and pianists and some very good dancers within the last month. Although we are moving on from the "music and sound" unit, we will keep instruments in our class and continue to support the children's interests.

We have started talking about pumpkins, leaves, and cooler weather. The children have been noticing the pumpkins around campus and the leaves on the ground and how they are changing colors. We are going to expand their interests and do seasonal activities related to "Fall and Harvest" for this month. We are going to continue to work on Number Concepts this month. The activities we will be doing will work on one-to-one correspondence, comparing groups using terms more, fewer, and same. We will be counting objects and matching number names to groups of objects. Our nursery rhyme for the month is Humpty, Dumpty. We'll send a copy of the words home so you can also practice with your child.

We have finished parent-teacher conferences and we would like to thank you for sharing your children with us. It has been a pleasure working with you and your children. Our class is rich with diversity. The children are all unique and it is rewarding to see them interact with each other regardless of their differences.

\*\*\* Please send \$10.00 snack fee as soon as possible

\*\*\* 11/10- Fire and Safety assembly- during school day

\*\*\* 11/17- Family Fun Night- 5:30-7:30
