Physical Safety Policy Statement

The physical safety and health of our employees and students are primary considerations in the operation of the schools in the Rio Rancho Public School District (“District”). The District and the Rio Rancho Board of Education (“Board”) are committed to providing a safe and healthful work place environment through the establishment of a culture of safety awareness in all of the District’s schools and operations.

The District and Board are committed to an employee safety program that will prevent employee injuries, property damage, and work interruptions resulting from unsafe conditions and work habits in the work place. In order to realize these objectives, we encourage all employees to promote physical safety and accident prevention and to make safety one of the District’s primary concerns.

The District recognizes that the responsibilities for physical safety in the schools are shared!

1. Employees are responsible for cooperating with each other to maintain a safe work place, including compliance with all rules and regulations, and for continuously practicing safety while performing their duties.

2. The employer is responsible for leadership in the development of a safety program, for its effectiveness and improvement.

3. All staff and students are responsible for promoting the proper attitudes toward safety, health, and wellness. Everyone should set good examples and ensure that all operations are performed with the utmost regard for the safety and health of all, including themselves.

The District and Board ask for the continual support of all the employees and students to insure the well-being of themselves and visitors of the District’s schools.

The District's goal is zero accidents and injuries.
