Food Services Policy

The superintendent is authorized and required to provide student food services, either through a district-operated program or by contracting with an outside agency or private company, as approved by the school board. The superintendent is responsible for insuring that the food program meets all requirements mandated by the state and federal governments for school meal programs. Food should always be served in the lunchroom unless an exception is made by the superintendent, the school principal or the designee. The school board shall be kept informed of the status of the food service program. Changes in meal prices shall be made only by the school board.

Students may bring personal meals from home and are encouraged to bring meals that comply with the standards of the District’s Health and Wellness Policy 358.
