

RIO RANCHO PUBLIC SCHOOLS

Igniting Student Potential

Great News For Home Schooling Parents

How It Works

Many people do not realize that when it comes to home schooling you truly CAN have it all! The freedom to home school your students while still benefiting from school district expertise and resources! Read inside to learn how RRPS can support your home schooled student—at no cost to you!

You can enroll your home schooler in as little as one class a semester in the district or up to three classes, depending on your student's needs. Doing so does not change your homeschooling status, but it does allow you the ability to take advantage of something the district offers free of charge and already funded by your tax dollars. Curricular materials are provided.

Because this option is separate from normal district enrollment, your choice(s) can be on-site, where your student comes daily to a class or lab, or in some cases off-site through an online cyber option. Any subject, K-12, can be accessed through our home schooling outreach program. It might be a required core course like math, science, language arts or social studies, or an elective your student simply finds interesting and wants to explore with a certified and licensed teacher in that field.

You spend a lot of time developing home schooling curricula to support your student's learning. While you are tailoring a program to meet your student's unique needs, think of us as another accessory in your educational closet!

Home schooling with a value-added twist!

Who Can Participate

Any currently home schooled, school-age student in New Mexico qualifies! You don't have to be a resident of Rio Rancho to take advantage of this opportunity. Under the New Mexico Open Enrollment Act, schools may allow inter-district and intra-district transfer options for all students "when there are sufficient accommodations to provide for them". Out of district parents will need to take an extra step of completing a transfer request form, and we would be happy to help you with that as well. It is our pleasure to roll out the welcome mat for you!

How We Can Help

Parents are often wonderful teachers, yet no one can be an expert in every subject. That's where Rio Rancho Public Schools can help.

Core subjects like advanced math, science, and technology, for example, may present challenges to you when you are trying to ensure you give your student every advantage in this global job market.

Likewise, special area topics like photography, movie making, forensics, robotics and sports medicine may be just the thing to round out your home schooler's renaissance education and experience! We can partner with you to add one or two of those courses with the rich experiences you are providing at home.

Home schooling is not an "all or nothing" option. RRPS can help you "have it all"!

Why We Do This

Just like you, we want the best for your student. If home schooling is working great for you but there is something we can do to enhance it, we want to help!
